

**Manufacturer**

**Model no.**

**Plus 4 You 02/SAE with Touch Screen**

**Product description**

Coffee machine – Semi automatic

**Origin**

**Specification**

Dimension	Electrical	Capacity	Equipped with
Width: 830 mm	Voltage: 230 V	Steam boiler 8 Ltr	<b>with</b> 2 group head
Height: 575 mm	Freq.: 50/60 Hz	Coffee boiler 2 x 1.2 Ltr	<b>with</b> LED illumination for work space
Depth: 580 mm	Power: 4.4 kW		<b>with</b> one hot water outlet
Weight: 74 kg	Amps: 21 amps		<b>with</b> two steam wand
			<b>with</b> automatic cleaning process

**Highlighted Features:**

**Green Technology**

As the first machine in Astoria’s Green Line, the Plus 4 You can save upto 47% on energy costs. This is accomplished through their newly developed software that learns peak times and regulates power distribution throughout the day as needed.

**Temperature Stability and Control**

The Plus 4 You features a separate boiler for each group head. The temperature of each group is controlled independently through the digital control panel. The electronic temperature control for each group provides precise temperature stability with a maximum temperature variance of 1°C. The temperature can be controlled for steam boiler, coffee water reservoir, and the individual group heads.

**Smart Technology**

Astoria’s green Technology learns the peak performance times during the day and the week and uses this information to put one or more group on standby during non-peak hours. The Astoria Plus 4 You also features self diagnostic systems which helps the barista identify errors in coffee extraction. If a shot is not extracted properly, the machine will show the barista a simple message recommending a fix.

**Standard Features**

- Volumetric dosing ( single or double shot)
- Touch Screen Display
- Display indicates ambient humidity
- Display indicates water pressure in the hydraulic circuit
- Display indicates volumetric pump pressure
- Programming of the washing cycles
